

Review Innotrans 2022 in Berlin

For Autronic the Berlin fair was a very important meeting opportunity bringing together all companies established in the railway technology market.

Compared with the fair of 2018 we have noticed that the number of visitors clearly rose (+15 %) and that our attractive product policy stimulated a lot of interest. Especially in the field of customer specific developments we were able to establish good new contacts. The InnoTrans is the

ideal venue to get a quick and comprehensive overview and to present the latest products to a huge number of specialists like we did for example by presenting our products HPC10, HFBC60-W/Ks, ACR120, HFC50, HFC 100 or HFC200.

Especially in the field of power electronics we see the tendency to develop applications to an increasing extent under ecological aspects and to place special emphasis on these aspects, besides miniaturization and enormous function enlargements. Our new products exactly meet these requirements. Our absolute highlight was that many visitors approached us with new project enquiries, not only from German-speaking countries, but many enquiries came from Asia. We hope that the Berlin fair will offer also in future best opportunities to maintain our good relationships with you, to continue to talk with you and do business successfully.

Information on the Fair:

Around 138,000 visitors from 137 countries | Around 2,800 exhibitors from 56 countries.
